

## DIGITAL VIDEO RECORDER MY 2014, MY2016

BULLETIN N.3

Dear Network,

Iveco Accessories has further enriched its safety offer with a **Digital Video Recorder (DVR)**. Designed for the installation on the windscreen, and hidden in the rearview-mirror area, the DVR records on micro SD and with wi-fi connection, can record and monitor also on smartphone.

**Don't miss to propose your customer a safer way of travelling!**

1

### COLLISION DETECTION FUNCTION

The DVR is equipped with a **built-in G sensor**. If the device is subjected to **strong impacts** while recording, the video will be automatically interrupted and **stored as special file**. Over-recording will not be possible.

2

### MOVEMENTS DETECTION FUNCTION

When the DVR detects a **close movement**, it will **start recording**. If no movement is detected for 5 seconds, the recording interrupts automatically.

3

### WI-FI FUNCTION

It allows to display **recordings in real time** also through the **APP** on smartphone.
